Model Problems

The following model problems are available and are dispatched via the following types.

```
Modules = [ExtendableASGFEM]
Pages = ["modelproblems/poisson_primal.jl",
          "modelproblems/logpoisson_primal.jl",
          "modelproblems/logpoisson_dual.jl"]
Order   = [:type, :function]
```

Solver

Each of the above model problems has an iterative solver implemented that is used as an default in the following solve method.

```
Modules = [ExtendableASGFEM]
Pages = ["modelproblems/modelproblems.jl"]
Order   = [:type, :function]
```

A posteriori error estimator
